

Francisco Sánchez Álvarez

UX/UI Designer | Product Designer (BIM Architect Background)

Madrid | (+34) 617584702 | fco.sanchez.a@gmail.com | [Portfolio](#) | [LinkedIn](#)

PROFESSIONAL PROFILE

UX/UI Designer trained at Neoland with 14 years of experience as an Architect in building projects and BIM methodology, focused on the technical resolution of spaces and on a design based on observing how people inhabit and coexist in them. I master **Figma** (Research, Wireframing and High-Fidelity Prototyping) and the creation of **Design Systems**.

My prior experience provides me with key maturity to make decisions based on human processes and high technical autonomy in using **generative AI tools** to optimize product design.

PROFESSIONAL EXPERIENCE

UX/UI Designer | Neoland Bootcamp, Madrid | October–December 2025:

- **Final Case Study “Kora” Web Platform:** I developed an end-to-end case study. Research, interface design and functional prototyping of an adaptive web platform, applying WCAG 2.2 accessibility criteria, under Design Thinking methodology.
- **Group Case Study “Del Revés” App to improve mental health:** I developed collaboratively, end-to-end design, a case study up to its prototype under Design Sprint methodology.
- **Initial Case Study “Mingo!” App:** I developed a mobile app, end-to-end, for flexible housing rental management, under Design Thinking methodology.

BIM Architect | Spain and Chile | 2011–2025:

- **User Research and Empathy:** I focused on the design and management of building projects, where analyzing and translating user needs was a key factor to achieve functional works and successful usage experiences.
- **Work Systems (BIM):** I implemented and led collaborative work standards (ISO 19650) and complex information management systems. This experience is the foundation of my current ability to create and maintain scalable digital Design Systems.
- **Problem Solving and Optimization:** I identified and solved critical technical and design issues, integrating automations and work protocols that allowed the team to reduce time and improve deliverable quality.
- **Stakeholder Management:** I coordinated direct relationships with clients, suppliers, and public agencies, ensuring technical feasibility and fulfillment of business objectives at each project phase.

TECHNICAL TOOLS AND COMPETENCIES

- **Design and Prototyping:** Figma (Advanced), high- and low-fidelity prototyping, Wireframing, Design System, UI Components.
- **Research and Strategy:** User Experience Research, Usability Testing, Information Architecture, Accessibility, Data Analytics.
- **Design Support Technology:** Python (basic automations, backend knowledge applied to design technical feasibility), HTML/CSS, SQL (basics), Git, Generative AI.
- **Methodologies and Management:** Design Thinking, Design Sprint, Scrum, Kanban, Information Management (ISO 19650).
- **Languages:** Native Spanish, English (estimated B2 level, professional use)

EDUCATION

- **UX/UI Design** | In-person Neoland Bootcamp | October – December 2025
- **Architect – Spain** | Master’s Qualifying Homologation in Spain | April 2025
- **Master in BIM and Integrated Design** | University of Barcelona + Econova | 2022-2023
- **Architect – Chile** | Pontificia Universidad Católica de Valparaíso | May 2011
