

Francisco Sánchez Álvarez

UX/UI Designer | Product Designer (BIM Architect Background)

Madrid | (+34) 617584702 | fco.sanchez.a@gmail.com | [Portfolio](#) | [LinkedIn](#)

PROFESSIONAL PROFILE

UX/UI Designer trained at **Neoland** with a solid background as a **BIM Architect**. My core value lies in the ability to translate **structural planning and user-centered design** from the physical world into the digital ecosystem.

I am proficient in the full design lifecycle within **Figma** (Research, Wireframing, and High-Fidelity Prototyping) and the creation of **Design System**. My previous experience provides key maturity for decision-making based on human processes and high technical autonomy in using **generative AI tools (Cursor, Figma + AI)** to optimize product design.

PROFESSIONAL EXPERIENCE

UX/UI Designer | Bootcamp Neoland, Madrid | October–December 2025:

- **Final Case Study “Kora” Web Platform:** Developed an end-to-end case study. Conducted research, interface design, and functional prototyping for a responsive web platform, applying WCAG 2.2 Accessibility criteria under Design Thinking methodology.
- **Group Case Study “Del Revés” Mental Health App:** Collaboratively developed an end-to-end case study up to the prototype stage using Design Sprint methodology.
- **Initial Case Study “Mingo!” App:** Developed an end-to-end mobile application for flexible housing rental management under Design Thinking methodology.

BIM Architect | Spain and Chile | 2011–January 2026:

- **User Research and Empathy:** Dedicated 14 years to the design and management of building projects, where analyzing and translating user needs was a key factor in achieving functional structures and successful user experiences.
- **Workflows and Systems (BIM):** Implemented and led collaborative work standards (ISO 19650) and complex information management systems. This experience serves as the foundation for my current ability to create and maintain scalable digital Design Systems.
- **Problem Solving and Optimization:** Identified and resolved critical technical and design issues, integrating automations and work protocols that allowed the team to reduce lead times and improve deliverable quality.
- **Stakeholder Management:** Coordinated direct relationships with clients, suppliers, and public agencies, ensuring technical feasibility and the fulfillment of business objectives in every project phase.

TOOLS AND TECHNICAL SKILLS

- **Design and Prototyping:** Figma (Advanced), High and Low-Fidelity Prototyping, Wireframing, Design Systems, UI Components.
- **Research and Strategy:** User Experience Research, Usability Testing, Information Architecture, Accessibility, Data Analytics.
- **Design Support Technology:** Python (basic automation, Backend knowledge applied to technical feasibility), HTML/CSS, SQL (notions), Git, Generative AI.
- **Methodologies and Management:** Design Thinking, Design Sprint, Scrum, Kanban, Information Management (ISO 19650).
- **Languages:** Spanish (Native), English (Estimated B1 level, frequent use in mixed environments)

EDUCATION

- **UX/UI Design** | Full-time and On-site Bootcamp Neoland | October – December 2025
- **Architect** - Spain | Master's Degree Equivalency (Máster Habilitante) | April 2025
- **Master in BIM and Integrated Design** | University of Barcelona + Econova | 2022-2023
- **Architect** - Chile | P. Universidad Católica de Valparaíso | May 2011
